SUMMARY

Computer Science engineer and AI builder, and co-founder of utter.sh, with hands-on experience across multi-LLM backends, secure REST APIs, automation, and cybersecurity. I build practical, production-ready systems with a local-first, privacy-first mindset. 230+ algorithmic problems solved; 5-star rated on HackerRank.

TECHNICAL SKILLS

Languages	Java, Python, SQL, ABAP
Frameworks & Tools	FastAPI, Spring Boot, Spring Security, JWT, REST APIs, Git, Linux
Core CS	Data Structures & Algorithms, OOP, DBMS, Multithreading, API Integration
AI & Automation	Multi-LLM Integration, LLM Agents, Prompt Engineering, Model Routing, Workflow Automation
Cloud & Security	AWS Cloud Foundations, Cybersecurity Fundamentals, Network Security, JWT/OAuth

EXPERIENCE

Industrial Training Intern — ONGC

AI-Powered IT Asset & Support Management System

- Built an AI-powered IT asset and support-management system during industrial training.
- Applied AI and backend development to streamline support workflows and improve asset-tracking accuracy.

Co-Founder — utter.sh

AI Agents & Automation Platform

- Co-founded an AI-driven automation platform for developer and business workflows.
- Built backend architecture, integrated multiple LLMs, and designed orchestration for real-world use cases.

Cybersecurity Internships — Palo Alto Networks, Deloitte (Forage), Exceler

- Palo Alto Networks & Deloitte (Forage): network security, secure-systems thinking, and incident-response simulations.
- Exceler: hands-on threat awareness, secure practices, and vulnerability analysis.

PROJECTS

ILLIP AI — Local-First AI Platform / Multi-LLM Backend

Python · FastAPI

- Built a FastAPI-based AI platform integrating multiple LLMs for assistant and automation workflows.
- Developed backend logic for prompt handling, model routing, API integration, and scalable deployment.

QuantumShield BioDefense OS — Real-Time Cybersecurity Dashboard

JavaScript

- Developed a live cybersecurity command-center dashboard for real-time threat monitoring and alerting.

Heat-to-Electricity System — AI + IoT Concept

Concept

- Designed a thermoelectric system to convert waste heat into usable electricity, with IoT-based efficiency monitoring.

ACHIEVEMENTS

- Solved 230+ problems on LeetCode; earned 5-star ratings in Java, Python, and SQL on HackerRank.
- Gold Medalist, National Science Olympiad; published a research paper in technology and cybersecurity.

CERTIFICATIONS

- | | |
|--|--------------------------------------|
| SAP Certified — Back-End Developer, ABAP Cloud | Java Developer — Infosys Springboard |
| AWS Academy Graduate — Cloud Foundations | NPTEL — Programming in Java (90%) |
| Alibaba Cloud Certified Developer | |

EDUCATION

B.Tech in Computer Science and Engineering — Pragati Engineering College
